**Subject:** Today Sponge

I am here to make my presence known as a woman who wants the Today Sponge be put back into the market on US shelves. I was only able to use the sponge once before it was pulled from the shelves in '96. I do not use The Pill - too many side effects - my choice was to be the sponge. And it will again. I ask the FDA to expedite the process so that this exceptional form of contraception be allowed on the shelves in the US again. To allow the modern women another useful option amongst a limited ocean of products.

I believe the Today Sponge to be a unharful, effective contraception and it needs to be sold in our borders. So, hurry FDA. Do the women a favor!

Regards!
